

South 66th Street Bridge Improvements

Sound Transit made improvements to the South 66th Street Bridge in Tacoma. This railroad bridge crosses South 66th Street between South Tacoma Way and South Adams Street in the South Tacoma neighborhood. Sounder trains began traveling this bridge when Sounder service to South Tacoma and Lakewood began in October 2012.

The contractor working for Sound Transit repaired the concrete bridge foundations, removed rust and old lead-based paint and repainted the bridge. Sound Transit and the Tacoma Art Program worked with an artist to create and install artwork for the refurbished underpass.

Mode

Commuter rail

Highlights

Start of service: October 2012

Location: South 66th Street between South Tacoma Way and South Adams Street
